

Description du produit

Anchor bolt 10x85 mm suitable for uprights for pallet racks. These anchor bolts are specifically used for fixing and anchoring uprights of pallet racking to the floor. Anchoring the uprights is crucial for the stability and safety of pallet racks, especially in situations where heavy loads are stored. The anchor bolts are made of durable and corrosion-resistant galvanized steel. This ensures that the fasteners can withstand environmental conditions in warehouses, such as humidity and corrosive substances.

Dimensions:

The diameter of the anchor bolt is 10 mm.

The length of the anchor bolt is 85 mm.

Spécifications
